# Frequently asked questioned

## **How could my business benefit from custom software?**

Investing in a custom software offers a huge advantage over your competitors. Your custom software is something that they can't have, with a well-designed software you should soon see yourself ahead in the competition.

## **Why is custom built software such a large investment?**

There are much cheaper software available all over the market. Having a customized software built from scratch does mean you would be looking at a bigger upfront investment. But this investment would be richly rewarded as you have a solution which perfectly match your needs. Many off-the-shelf software products have monthly subscription packages which might ultimately cost more than a custom software.

The background of the slide is a blurred image of a server room with multiple racks of servers and glowing lights. A large, stylized graphic is overlaid on the image, consisting of a white triangle pointing downwards from the top right and a dark blue triangle pointing upwards from the bottom left, meeting at a diagonal line.

# Thank you

Looking forward to continuing this journey together.
