Machine capacity table

Maximise the outputs level

PASSION + **PRODUCTION =** PERFORMANCE

PRECISE DATA DISPLAY WITHOUT DISTURBANCE.

W-ERP's production module helps you to greatly reduce the overall costs, time-to-market, optimize the production development lifecycle, find the most efficient plant model, increasingly improving equipment performance, reduce non-productive work time, improve product quality and more.

BOOST YOUR WAREHOUSE CAPABILITY

INNOVATIVE EVOLUTION ON INVENTORY MANAGEMENT.

- Balance overstock and outstanding stock which helps to reduce inventory carrying costs.
- Monitor and adjust warehouse transaction effortlessly.
- Stock performance analysis.

STRAIGHTFORWARD SUPPLIERS & PURCHASE MANAGEMENT

EXHAUSTIVE & IN-DEPTH.

Manage Multi Suppliers

Dynamic Statistics

Real-time Tracking

ABSOLUTE INSPECTION

PROFIT MAXIMIZATION.

Without time consuming data retyping, the system generates quotation, sales order, packing list, delivery note, sales invoice and updates accounting records that will most importantly simplifies the profiling procedure, as well as guarantees on-time delivery and high-level customer service.

QUALITY CONTROL

OVER YOUR PRECIOUS OUTPUTS.

Inspecting quality at every phase of your industrial operations, this quality control ERP module also offers full control of receipting and rejecting materials. Along with providing the flexibility of defining your own tests, associating them with required items, ERP's Quality Control module offers double sampling for better quality assurance in today's extremely competitive market, quality is the king that could make competitors. The pressure to significantly decrease time and costly error make companies form and keep up quality assurance criteria that fully support the industry regulations.
